ITI Summer Training

Learned C# Programming, SQL Server Database Design, Entity Framework Core, LINQ, ASP.NET Core MVC, HTML5, CSS3, Responsive Design

Project 1

Job Hunter is a comprehensive platform that connects companies seeking talent with individuals searching for employment. It enables business owners to post job openings and browse candidate resumes, while providing job seekers with a powerful tool to discover and apply for positions effortlessly. The platform delivers a seamless user experience, including features such as building a professional resume directly on the site—making the job search process smooth and efficient.
